WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 1 Vol. LXXXIX. WEEK ENDED SATURDAY, 5TH JANUARY, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 390—204 boys and 186 girls, while the number of births to mothers normally resident in the County Borough was 329.

The number of deaths registered was 131—70 males and 61 females. The number of deaths of persons resident in the County Borough was 108.

Tuberculosis caused 4 deaths (all of which were from tuberculosis of the respiratory system), as against 7, 6 and 2 in the three preceding weeks.

Ten deaths were due to malignant neoplasms, compared with 18, 15 and 4 in the three preceding weeks.

There were 6 deaths from pneumonia and bronchitis caused 10 deaths.

One accidental death was registered.

Among the deaths of infants under 1 year, 2 were due to pneumonia, one to bronchitis and 2 to congenital malformations.

Six of the deaths recorded during the week for the County Borough were those of of children under one year of age, one of whom was under one month old. Deaths of persons aged 65 years and upwards numbered 66.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 5th January, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 2 Vol. LXXXIX. WEEK ENDED SATURDAY, 12TH JANUARY, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 342—174 boys and 168 girls, while the number of births to mothers normally resident in the County Borough was 275.

The number of deaths registered was 154—84 males and 70 females. The number of deaths of persons resident in the County Borough was 129.

Tuberculosis caused 13 deaths (11 of which were from tuberculosis of the respiratory system, one from tuberculous meningitis and one from miliary tuberculosis) as against 6, 2 and 4 in the three preceding weeks.

Twelve deaths were due to malignant neoplasms, compared with 15, 4 and 10 in the three preceding weeks.

There were 11 deaths from pneumonia and bronchitis caused 6 deaths.

Eleven accidental deaths were registered.

Among the deaths of infants under 1 year, one was due to gastro enteritis, 8 to pneumonia 3 to congenital malformations and 3 to premature birth.

Nineteen of the deaths recorded during the week for the County Borough were those of children under one year of age, 7 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 57.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 12th January, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 3 Vol. LXXXIX. WEEK ENDED SATURDAY, 19TH JANUARY, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 364—176 boys and 188 girls, while the number of births to mothers normally resident in the County Borough was 293.

The number of deaths registered was 137—70 males and 67 females. The number of deaths of persons resident in the County Borough was 116.

Tuberculosis caused 5 deaths (all of which were from tuberculosis of the respiratory system as against 2, 4 and 13 in the three preceding weeks.

Ten deaths were due to malignant neoplasms, compared with 4, 10 and 12 in the three preceding weeks.

There were 6 deaths from pneumonia and bronchitis caused 5 deaths.

Ten accidental deaths were registered.

Among the deaths of infants under 1 year, one was due to broncho pneumonia, 2 to congenital malformations, 2 to injury at birth and 10 to premature birth.

Seventeen of the deaths recorded during the week for the County Borough were those of children under one year of age, 14 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 58.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 19th January, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 4 Vol. LXXXIX. WEEK ENDED SATURDAY, 26TH JANUARY, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 302—149 boys and 153 girls, while the number of births to mothers normally resident in the County Borough was 237.

The number of deaths registered was 134—67 males and 67 females. The number of deaths of persons resident in the County Borough was 117.

Tuberculosis caused 10 deaths (all of which were from tuberculosis of the respiratory system) as against 4, 13 and 5 in the three preceding weeks.

Nine deaths were due to malignant neoplasms, compared with 10, 12 and 10 in the three preceding weeks.

There were 7 deaths from pneumonia and bronchitis caused 3 deaths.

Five accidental deaths were registered.

Among the deaths of infants under 1 year, 3 were due to pneumonia, 3 to congenital malformations, 2 to injury at birth and 4 to premature birth.

Sixteen of the deaths recorded during the week for the County Borough were those of children under one year of age, 12 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 54.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 26th January, 1952 for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 5 Vol. LXXXIX. WEEK ENDED SATURDAY, 2ND FEBRUARY, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 302—157 boys and 145 girls, while the number of births to mothers normally resident in the County Borough was 229.

The number of deaths registered was 157—91 males and 66 females. The number of deaths of persons resident in the County Borough was 123.

Tuberculosis caused 6 deaths (4 of which were from tuberculosis of the respiratory system one from tuberculous meningitis and one from Pott's caries) as against 13, 5 and 10 in the three preceding weeks.

Seventeen deaths were due to malignant neoplasms, compared with 12, 10 and 9 in the three preceding weeks.

There were 6 deaths from pneumonia and bronchitis caused 9 deaths.

Two accidental deaths and one death by suicide were registered.

Among the deaths of infants under 1 year, one was due to gastro-enteritis, one to pneumonia, one to congenital malformation, 2 to injury at birth and one to premature birth.

Ten of the deaths recorded during the week for the County Borough were those of children under one year of age, 5 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 72.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 2nd February, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 6 Vol. LXXXIX. WEEK ENDED SATURDAY, 9TH FEBRUARY, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 295—144 boys and 151 girls, while the number of births to mothers normally resident in the County Borough was 232.

The number of deaths registered was 153—76 males and 77 females. The number of deaths of persons resident in the County Borough was 127.

Tuberculosis caused 8 deaths (6 of which were from tuberculosis of the respiratory system and 2 from tuberculous meningitis) as against 5, 10 and 6 in the three preceding weeks.

Fourteen deaths were due to malignant neoplasms, compared with 10, 9 and 17 in the three preceding weeks.

There were 9 deaths from pneumonia and bronchitis caused 10 deaths.

One accidental death was registered.

Among the deaths of infants under 1 year, 3 were due to pneumonia, one to congenital malformation, one to injury at birth and 2 to premature birth.

Seven of the deaths recorded during the week for the County Borough were those of children under one year of age, 5 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 68.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 9th February, 1952 for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 7 Vol. LXXXIX. WEEK ENDED SATURDAY, 16TH FEBRUARY, 1952. PRICE 2d. NET.

THE SANITARY INSTITUTE LIBRARY

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 311—154 boys and 157 girls, while the number of births to mothers normally resident in the County Borough was 244.

The number of deaths registered was 161—75 males and 86 females. The number of deaths of persons resident in the County Borough was 129.

Tuberculosis caused 6 deaths (all of which were from tuberculosis of the respiratory system as against 10, 6 and 8 in the three preceding weeks.

Eleven deaths were due to malignant neoplasms, compared with 9, 17 and 14 in the three preceding weeks.

There were 7 deaths from pneumonia and bronchitis caused 11 deaths.

Four accidental deaths were registered.

Among the deaths of infants under 1 year 6 were due to pneumonia, one to congenital malformation, and one to inattention at birth.

Ten of the deaths recorded during the week for the County Borough were those of children under one year of age, 4 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 75.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 16th February, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 8 Vol. LXXXIX. WEEK ENDED SATURDAY, 23RD FEBRUARY, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 352—182 boys and 170 girls, while the number of births to mothers normally resident in the County Borough was 272.

The number of deaths registered was 145—72 males and 73 females. The number of deaths of persons resident in the County Borough was 118.

Tuberculosis caused 7 deaths (6 of which were from tuberculosis of the respiratory system and one from tuberculosis of the kidney) as against 6, 8 and 6 in the three preceding weeks.

Eleven deaths were due to malignant neoplasms, compared with 17, 14 and 11 in the three preceding weeks.

There were 13 deaths from pneumonia and bronchitis caused 5 deaths.

Two accidental deaths were registered.

Among the deaths of infants under 1 year 3 were due to pneumonia.

Five of the deaths recorded during the week for the County Borough were those of children under one year of age, 2 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 70.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 23rd February, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 9 Vol. LXXXIX. WEEK ENDED SATURDAY, 1ST MARCH 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 319—172 boys and 147 girls, while the number of births to mothers normally resident in the County Borough was 246.

The number of deaths registered was 161—94 males and 67 females. The number of deaths of persons resident in the County Borough was 138.

Tuberculosis caused 7 deaths (6 of which were from tuberculosis of the respiratory system and one from tuberculous meningitis) as against 8, 6 and 7 in the three preceding weeks.

Thirteen deaths were due to malignant neoplasms, compared with 14, 11 and 11 in the three preceding weeks.

There were 15 deaths from pneumonia and bronchitis caused 7 deaths.

Five accidental deaths were registered.

Among the deaths of infants under 1 year one was due to tuberculous meningitis, 8 to pneumonia, 2 to congenital malformations, 3 to injury at birth and 5 to premature birth.

Twenty-three of the deaths recorded during the week for the County Borough were those of children under one year of age, 13 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 64.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 1st March, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS FOR THE PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 10 Vol. LXXXIX. WEEK ENDED SATURDAY, 8TH MARCH 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 304—139 boys and 165 girls, while the number of births to mothers normally resident in the County Borough was 245.

The number of deaths registered was 153—82 males and 71 females. The number of deaths of persons resident in the County Borough was 129.

Tuberculosis caused 12 deaths (10 of which were from tuberculosis of the respiratory system, one from tuberculous meningitis and one from tuberculosis of the kidney), as against 6, 7 and 7 in the three preceding weeks.

Eighteen deaths were due to malignant neoplasms, compared with 11, 11 and 13 in the three preceding weeks.

There were 4 deaths from pneumonia and bronchitis caused 10 deaths.

Four accidental deaths were registered.

Among the deaths of infants under 1 year one was due to pneumonia, 2 to congenital malformations and one to debility.

Five of the deaths recorded during the week for the County Borough were those of children under one year of age, 2 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 78.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 8th March, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN.

No. 11 Vol. LXXXIX. WEEK ENDED SATURDAY, 15TH MARCH 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 349—176 boys and 173 girls, while the number of births to mothers normally resident in the County Borough was 278.

The number of deaths registered was 125—68 males and 57 females. The number of deaths of persons resident in the County Borough was 101.

Tuberculosis caused 8 deaths (all of which were from tuberculosis of the respiratory system), as against 7, 7 and 12 in the three preceding weeks.

Ten deaths were due to malignant neoplasms, compared with 11, 13 and 18 in the three preceding weeks.

There were 2 deaths from pneumonia and bronchitis caused 7 deaths.

One accidental death was registered.

Among the deaths of infants under 1 year one was due to pneumonia, 2 to congenital malformations, one to injury at birth, 1 to convulsions, 3 to atelectasis with prematurity, and 3 to premature birth.

Eleven of the deaths recorded during the week for the County Borough were those of children under one year of age, 8 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 55.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 15th March, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 12 Vol. LXXXIX. WEEK ENDED SATURDAY, 22ND MARCH 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 314—157 boys and 157 girls, while the number of births to mothers normally resident in the County Borough was 252.

The number of deaths registered was 122—77 males and 45 females. The number of deaths of persons resident in the County Borough was 93.

Tuberculosis caused 7 deaths (6 of which were from tuberculosis of the respiratory system and one from miliary tuberculosis) as against 7, 12 and 8 in the three preceding weeks.

Twelve deaths were due to malignant neoplasms, compared with 13, 18 and 10 in the three preceding weeks.

There were 6 deaths from pneumonia and bronchitis caused 5 deaths.

One accidental death was registered.

Among the deaths of infants under 1 year two were due to pneumonia, one to injury at birth, 2 to atelectasis with prematurity, one to gastro enteritis, one to septicaemia with prematurity, one to tetany and one to premature birth.

Nine of the deaths recorded during the week for the County Borough were those of children under one year of age, 5 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 49.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 22nd March, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 13 Vol. LXXXIX. WEEK ENDED SATURDAY, 29TH MARCH 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 273—126 boys and 147 girls, while the number of births to mothers normally resident in the County Borough was 197.

The number of deaths registered was 118—65 males and 53 females. The number of deaths of persons resident in the County Borough was 94.

The one death recorded for the week from tuberculosis was of the respiratory system as against 12 8 and 7 in the three preceding weeks.

Fifteen deaths were due to malignant neoplasms, compared with 18, 10 and 13 in the three preceding weeks.

There were 2 deaths from pneumonia and bronchitis caused 9 deaths.

Six accidental deaths were registered.

Among the deaths of infants under 1 year one was due to pneumonia and 2 to premature birth.

Four of the deaths recorded during the week for the County Borough were those of children under one year of age, one of whom was under one month old. Deaths of persons aged 65 years and upwards numbered 48.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 29th March, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 14 Vol. LXXXIX. WEEK ENDED SATURDAY, 5TH APRIL 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 368—211 boys and 157 girls, while the number of births to mothers normally resident in the County Borough was 281.

The number of deaths registered was 116—59 males and 57 females. The number of deaths of persons resident in the County Borough was 93.

Tuberculosis caused 5 deaths (all of which were from tuberculosis of the respiratory system as against 8, 7 and one in the three preceding weeks.

Twelve deaths were due to malignant neoplasms, compared with 10, 13 and fifteen in the three preceding weeks.

There were two deaths from pneumonia and bronchitis caused five deaths.

Two accidental deaths were registered.

Among the deaths of infants under 1 year one was due to pneumonia, 2 to premature birth, 2 to congenital malformation and one to debility.

Seven of the deaths recorded during the week for the County Borough were those of children under one year of age, 3 of whom was under one month old. Deaths of persons aged 65 years and upwards numbered 51.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 5th April, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 15 Vol. LXXXIX. WEEK ENDED SATURDAY, 12TH APRIL 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 298—136 boys and 162 girls, while the number of births to mothers normally resident in the County Borough was 236.

The number of deaths registered was 125 —69 males and 56 females. The number of deaths of persons resident in the County Borough was 92.

Tuberculosis caused 7 deaths (six of which were from tuberculosis of the respiratory system and one from tubercular disease of the hip), as against 7, one and 5 in the three preceding weeks.

Twelve deaths were due to malignant neoplasms, compared with 13, 15 and 12 in the three preceding weeks.

There were 3 deaths from pneumonia and bronchitis caused 8 deaths.

Among the deaths of infants under 1 year one was due to measles, 2 to convulsions, one to enteritis and one to atelectasis with prematurity.

Five of the deaths recorded during the week for the County Borough were those of children under one year of age, one of whom was under one month old. Deaths of persons aged 65 years and upwards numbered 52.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 12th April, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 16 Vol. LXXXIX. WEEK ENDED SATURDAY, 19TH APRIL 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 424—222 boys and 202 girls, while the number of births to mothers normally resident in the County Borough was 321.

The number of deaths registered was 130—75 males and 55 females. The number of deaths of persons resident in the County Borough was 107.

Tuberculosis caused 5 deaths (4 of which were from tuberculosis of the respiratory system and one from tuberculous meningitis), as against one, 5 and 7 in the three preceding weeks.

Ten deaths were due to malignant neoplasms, compared with 15, 12 and 13 in the three preceding weeks.

There were 6 deaths from pneumonia and bronchitis caused 12 deaths.

One accidental death was registered. There was also one death by suicide.

Among the deaths of infants under 1 year one was due to measles, one to convulsions, one to enteritis, one to atelectasis, one to tuberculous meningitis, and one to pneumonia.

Six of the deaths recorded during the week for the County Borough were those of children under one year of age, one of whom was under one month old. Deaths of persons aged 65 years and upwards numbered 58.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 19th April, 1952 for the Principal Towns with similar particulars for BELFAST and DERRY.

CUNNTAS SEACHTAINIUIL na mBREITH agus na mBAS

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 17 Vol. LXXXIX. WEEK ENDED SATURDAY, 26TH APRIL 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 365—178 boys and 187 girls, while the number of births to mothers normally resident in the County Borough was 292.

The number of deaths registered was 130—70 males and 60 females. The number of deaths of persons resident in the County Borough was 109.

Tuberculosis caused 4 deaths (all of which were from tuberculosis of the respiratory system) as against 5, 7 and 5 in the three preceding weeks.

Twenty deaths were due to malignant neoplasms, compared with 12, 13 and 10 in the three preceding weeks.

There were 3 deaths from pneumonia and bronchitis caused 5 deaths.

Three accidental deaths were registered.

Among the deaths of infants under one year, 2 were due to measles, one to convulsions, 2 to atelectasis, one to meningitis, one to pneumonia, one to meningocele, one to prematurity, 3 to birth injuries and 3 to congenital malformations.

Twenty of the deaths recorded during the week for the County Borough were those of children under one year of age, fourteen of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 55.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 26th April, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 18 Vol. LXXXIX. WEEK ENDED SATURDAY, 3RD MAY, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 380—193 boys and 187 girls, while the number of births to mothers normally resident in the County Borough was 316.

The number of deaths registered was 121—65 males and 56 females. The number of deaths of persons resident in the County Borough was 93.

Tuberculosis caused 8 deaths (6 of which were from tuberculosis of the respiratory system, one from miliary, and one from generalised tuberculosis) as against 7, 5 and 4 in the preceding weeks.

Fifteen deaths were due to malignant neoplasms, compared with 13,10 and 20 in the three preceding weeks.

There were 2 deaths from pneumonia and bronchitis caused 3 deaths.

One accidental death was registered.

Among the deaths of infants under one year,one was due to meningitis, two to pneumonia, one to prematurity, and four to congenital malformations.

Nine of the deaths recorded during the week for the County Borough were those of children under one year of age, six of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 48.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 3rd May, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 19 Vol. LXXXIX. WEEK ENDED SATURDAY, 10TH MAY, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 394—190 boys and 204 girls, while the number of births to mothers normally resident in the County Borough was 312.

The number of deaths registered was 118—58 males and 60 females. The number of deaths of persons resident in the County Borough was 92.

Tuberculosis caused 2 deaths all of which were from tuberculosis of the respiratory system.

Nine deaths were due to malignant neoplasms.

There were 2 deaths from pneumonia and bronchitis caused 3 deaths.

Two accidental deaths were registered, one of which was caused by drowning.

Among the deaths of infants under one year ,one was due to gastro-enteritis, one to congenenital malformations, one to pneumonia of new born and one to haemolytic disease of new born.

Four of the deaths recorded during the week for the County Borough were those of children under one year of age, two of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 52.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 10th May, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 20 Vol. LXXXIX. WEEK ENDED SATURDAY, 17TH MAY, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 379—202 boys and 177 girls, while the number of births to mothers normally resident in the County Borough was 286.

The number of deaths registered was 135—78 males and 57 females. The number of deaths of persons resident in the County Borough was 116.

Tuberculosis caused 7 deaths of which 6 were from tuberculosis of the respiratory system and one from tuberculous meningitis.

Measles caused one death.

Nineteen deaths were due to malignant neoplasms.

There was one death from influenza, 7 from pneumonia and 6 from bronchitis.

Among the deaths of infants under one year, one was due to meningitis, one to broncho-pneumonia, one to injury at birth and 3 to haemolytic disease of new born.

Seven of the deaths recorded during the week for the County Borough were those of children under one year of age, four of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 67.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 17th May, 1952 for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 21 Vol. LXXXIX. WEEK ENDED SATURDAY, 24TH MAY, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 405—191 boys and 214 girls, while the number of births to mothers normally resident in the County Borough was 338.

The number of deaths registered was 100—51 males and 49 females. The number of deaths of persons resident in the County Borough was 78.

Tuberculosis caused 10 deaths of which 6 were from tuberculosis of the respiratory system and three from tuberculous meningitis.

Ten deaths were due to malignant neoplasms.

There were 2 deaths from pneumonia and two from bronchitis.

Among the deaths of infants under one year, one was due to acute laryngotracheo-bronchitis, 3 to atelectasis of newborn, one to respiratory failure and 6 from premature birth.

Eleven of the deaths recorded during the week for the County Borough were those of children under one year of age, ten of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 31.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 24th May, 1952 for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 22 Vol. LXXXIX. WEEK ENDED SATURDAY, 31ST MAY, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 329—161 boys and 168 girls, while the number of births to mothers normally resident in the County Borough was 253.

The number of deaths registered was 122—59 males and 63 females. The number of deaths of persons resident in the County Borough was 94.

Tuberculosis caused 5 deaths, all of which were from tuberculosis of the respiratory system.

Fifteen deaths were due to malignant neoplasms.

There were 2 deaths from pneumonia and 4 from bronchitis.

Seven accidental deaths were registered of which one was due to drowning, one to hanging and one to burns.

Among the deaths of infants under one year, 2 were due to bronchopneumonia, one to congenital malformation, one to injury at birth, 3 to atelectasis and 2 to pneumonia of newborn.

Nine of the deaths recorded during the week for the County Borough were those of children under one year of age, six of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 40.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 31st May, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 23 Vol. LXXXIX. WEEK ENDED SATURDAY, 7TH JUNE, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 345—193 boys and 152 girls, while the number of births to mothers normally resident in the County Borough was 268.

The number of deaths registered was 99—49 males and 50 females. The number of deaths of persons resident in the County Borough was 79.

Tuberculosis caused 7 deaths, all of which were from tuberculosis of the respiratory system.

Eight deaths were due to malignant neoplasms.

There was one death from pneumonia and there were 3 from bronchitis.

Among the deaths of infants under one year, one was due to bronchopneumonia, one to congenital malformation, one to injury at birth, one to atelectasis, one to premature birth and one to pneumonia of newborn.

Six of the deaths recorded during the week for the County Borough were those of children under one year of age, 5 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 45.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 7th June, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 24 Vol. LXXXIX. WEEK ENDED SATURDAY, 14TH JUNE, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 355—189 boys and 166 girls, while the number of births to mothers normally resident in the County Borough was 270.

The number of deaths registered was 116—53 males and 63 females. The number of deaths of persons resident in the County Borough was 88.

Tuberculosis caused 7 deaths, 6 of which were from tuberculosis of the respiratory system and one from tuberculous meningitis.

Fourteen deaths were due to malignant neoplasms.

There were two deaths from pneumonia and there were 3 from bronchitis.

Two accidental deaths were registered, one of which was a motor vehicle transport accident.

Among the deaths of infants under one year, one was due to bronchopneumonia, one to injury at birth, one to marasmas, one to heart failure and one to premature birth.

Five of the deaths recorded during the week for the County Borough were those of children under one year of age, 3 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 44.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 14th June, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 25 Vol. LXXXIX. WEEK ENDED SATURDAY, 21ST JUNE, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 325—167 boys and 158 girls, while the number of births to mothers normally resident in the County Borough was 243.

The number of deaths registered was 113—64 males and 49 females. The number of deaths of persons resident in the County Borough was 91.

Tuberculosis caused 5 deaths all of which were from tuberculosis of the respiratory system.

Whooping cough caused one death.

Seventeen deaths were due to malignant neoplasms.

There were two deaths from pneumonia and there were 4 from bronchitis.

One accidental death was registered and this was caused by drowning.

Among the deaths of infants under one year, one was due to whooping cough, one was due to bronchopneumonia, one to injury at birth, three to atelectasis, one to pneumonia of newborn and one to premature birth.

Eight of the deaths recorded during the week for the County Borough were those of children under one year of age, 6 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 50.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 21st June, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

CÚNNTAS SEACHTAINIÚIL na mBREITH agus na mBÁS

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 26 Vol. LXXXIX. WEEK ENDED SATURDAY, 28TH JUNE, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II. information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 375—198 boys and 177 girls, while the number of births to mothers normally resident in the County Borough was 293.

The number of deaths registered was 120—57 males and 63 females. The number of deaths of persons resident in the County Borough was 91.

Tuberculosis caused 4 deaths all of which were from tuberculosis of the respiratory system.

Measles caused one death.

Fourteen deaths were due to malignant neoplasms.

There were three deaths from pneumonia and there were 2 from bronchitis.

Three accidental deaths were registered one of which was caused by drowning.

Among the deaths of infants under one year, one was due to measles, one to gastro-enteritis, 2 to congenital malformations, one to injury at birth, 2 to atelectasis and one to pneumonia of newborn.

Eight of the deaths recorded during the week for the County Borough were those of children under one year of age, 6 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 50.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 28th June, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 27 Vol. LXXXIX. WEEK ENDED SATURDAY, 5TH JULY, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 331—175 boys and 156 girls, while the number of births to mothers normally resident in the County Borough was 263.

The number of deaths registered was 121—60 males and 61 females. The number of deaths of persons resident in the County Borough was 95.

Tuberculosis caused 9 deaths 6 of which were from tuberculosis of the respiratory system, two from tuberculous menigitis and one from tuberculosis of the knee joint.

Seventeen deaths were due to malignant neoplasms.

There were seven deaths from pneumonia.

Three accidental deaths were registered.

Among the deaths of infants under one year, one was due to gastro-enteritis, one to congenital malformation and one to broncho-pneumonia.

Seven of the deaths recorded during the week for the County Borough were those of children under one year of age, 3 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 43.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 5th July, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 28 Vol. LXXXIX. WEEK ENDED SATURDAY, 12TH JULY, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 334—175 boys and 159 girls, while the number of births to mothers normally resident in the County Borough was 254.

The number of deaths registered was 93—44 males and 49 females. The number of deaths of persons resident in the County Borough was 74.

Tuberculosis caused 3 deaths, all of which were from tuberculosis of the respiratory system.

There was one death from acute infectious encephalitis.

18 deaths were due to malignant neoplasms.

There were 3 deaths from pneumonia.

One accidental death was registered. This death was due to a fall.

Among the deaths of infants under one year, one was due to gastro-enteritis, one to congenital debility, one to broncho-pneumonia and one to premature birth.

Four of the deaths recorded during the week for the County Borough were those of children under one year of age, one of whom was under one month old. Deaths of persons aged 65 years and upwards numbered 38.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 12th July, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 29 Vol. LXXXIX. WEEK ENDED SATURDAY, 19th JULY, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 368—181 boys and 187 girls, while the number of births to mothers normally resident in the County Borough was 308.

The number of deaths registered was 111—64 males and 47 females. The number of deaths of persons resident in the County Borough was 78.

Tuberculosis caused 7 deaths, 6 of which were from tuberculosis of the respiratory system and one from tuberculous meningitis.

9 deaths were due to malignant neoplasms.

There were 5 deaths from pneumonia.

Four accidental deaths were registered, three from motor vehicle transport accidents and one from a fall in the course of employment.

Among the deaths of infants under one year, one was due to whooping cough, one to injury at birth. one to congenital malformation and 2 to prematurity.

Five of the deaths recorded during the week for the County Borough were those of children under one year of age, 3 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 30.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 19th July, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 30 Vol. LXXXIX. Week Ended Saturday, 26th July, 1952. Price 2d. Net.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 322—155 boys and 167 girls, while the number of births to mothers normally resident in the County Borough was 244.

The number of deaths registered was 100—56 males and 44 females. The number of deaths of persons resident in the County Borough was 82.

Tuberculosis caused 4 deaths, 3 of which were from tuberculosis of the respiratory system and one from tuberculous meningitis.

Fourteen deaths were due to malignant neoplasms.

There was one death from pneumonia.

Three accidental deaths were registered. These were due to drowning.

Among the deaths of infants under one year, one was due to tuberculous meningitis, one to broncho-pneumonia, 2 to prematurity and 2 to injury at birth.

Seven of the deaths recorded during the week for the County Borough were those of children under one year of age, 3 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 46.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 26th July, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 31 Vol. LXXXIX. WEEK ENDED SATURDAY, 2nd AUGUST, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 311—133 boys and 178 girls, while the number of births to mothers normally resident in the County Borough was 272.

The number of deaths registered was 113—62 males and 58 females. The number of deaths of persons resident in the County Borough was 95.

Tuberculosis caused 5 deaths, 4 of which were from tuberculosis of the respiratory system and one from tuberculous meningitis.

Seventeen deaths were due to malignant neoplasms.

There were seven deaths from pneumonia.

Seven accidental deaths were registered, five of which were motor vehicle traffic accidents. One was due to drowning and one to a fall.

Among the deaths of infants under one year, one was due to tuberculous meningitis, one to whooping cough, one to broncho-pneumonia, one to lobar pneumonia ,one to gastro-enteritis, four to congenital malformations and four to other diseases of early infancy.

Thirteen of the deaths recorded during the week for the County Borough were those of children under one year of age, 5 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 41.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 2nd August, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 32 Vol. LXXXIX. WEEK ENDED SATURDAY, 9th AUGUST, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 279—145 boys and 134 girls, while the number of births to mothers normally resident in the County Borough was 209.

The number of deaths registered was 94—51 males and 43 females. The number of deaths of persons resident in the County Borough was 76.

Tuberculosis caused 7 deaths, 5 of which were from tuberculosis of the respiratory system and two from tuberculous meningitis.

Sixteen deaths were due to malignant neoplasms.

There were three deaths from pneumonia and four from bronchitis.

Three accidental deaths were registered, one was due to a motor accident one to burns and one to a fall. There was one death by suicide.

Among the deaths of infants under one year, one was due to pneumonia and three to prematurity.

Five of the deaths recorded during the week for the County Borough were those of children under one year of age, three of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 36.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 9th August, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 33 Vol. LXXXIX. Week Ended Saturday, 16th August, 1952. Price 2d. Net.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 359—180 boys and 179 girls, while the number of births to mothers normally resident in the County Borough was 272.

The number of deaths registered was 85—43 males and 42 females. The number of deaths of persons resident in the County Borough was 69.

Tuberculosis caused 4 deaths, all of which were from tuberculosis of the respiratory system.

Six deaths were due to malignant neoplasms.

There were four deaths from pneumonia and 2 from bronchitis.

One accidental death was registered.

Among the deaths of infants under one year, one was due to pneumonia, one to congenital malformation, one to prematurity and one to debility.

Four of the deaths recorded during the week for the County Borough were those of children under one year of age, one of whom was under one month old. Deaths of persons aged 65 years and upwards numbered 38.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 16th August, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 34 Vol. LXXXIX. WEEK ENDED SATURDAY, 23rd AUGUST, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 338—168 boys and 170 girls, while the number of births to mothers normally resident in the County Borough was 281.

The number of deaths registered was 95—46 males and 49 females. The number of deaths of persons resident in the County Borough was 71.

Tuberculosis caused 2 deaths, all of which were from tuberculosis of the respiratory system.

Seventeen deaths were due to malignant neoplasms.

There were 4 deaths from pneumonia and there was one from bronchits.

One accidental death was registered. This death was the result of a road transport accident.

Among the deaths of infants under one year one was due to gastro-enteritis, 2 to broncho-pneumonia, 2 to prematurity, one to congenital malformation, one to injury at birth and one to debility.

Nine of the deaths recorded during the week for the County Borough were those of children under one year of age, 2 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 34.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 23rd August, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 35 Vol. LXXXIX. WEEK ENDED SATURDAY, 30TH AUGUST, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 235—120 boys and 115 girls, while the number of births to mothers normally resident in the County Borough was 208.

The number of deaths registered was 94—53 males and 41 females. The number of deaths of persons resident in the County Borough was 72.

One death from pulmonary tuberculosis was recorded.

Thirteen deaths were due to malignant neoplasms.

There were three deaths from pneumonia. Bronchitis caused six deaths.

Four accidental deaths were registered, two of which were caused by transport vehicles, and one by a fall.

Among the deaths of infants under one year, two were due to congenital malformations, two to prematurity, four to atelectasis, one to pneumonia of the newborn, two to haemolytic disease, and one to suffocation.

Twelve of the deaths recorded during the week for the County Borough were those of children under one year of age, eleven of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 35.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 36 Vol. LXXXIX. WEEK ENDED SATURDAY, 6TH SEPTEMBER, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 413—202 boys and 211 girls, while the number of births to mothers normally resident in the County Borough was 316.

The number of deaths registered was 108—51 males and 57 females. The number of deaths of persons resident in the County Borough was 84.

Seven deaths from tuberculosis were recorded, 6 of which were from tuberculosis of the respiratory system and one from tuberculous meningitis.

Fifteen deaths were due to malignant neoplasms.

There were 2 deaths from pneumonia, one from influenza and one from bronchitis.

Two deaths were caused by drowning.

Among the deaths of infants under one year, 2 were due to congenital malformations, 2 to haemolytic disease, one to atelectasis, one to intra-cranial haemorrhage and one to upper respiratory tract infection.

Seven of the deaths recorded during the week for the County Borough were those of children under one year of age, 6 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 35.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 6th September, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY

THE ROYAL SANITARY INSTITUTE

CUNNTAS SEACHTAINIÚIL na mBREITH agus na mBAS

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 37 Vol. LXXXIX. WEEK ENDED SATURDAY, 13TH SEPTEMBER, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 405—212 boys and 193 girls, while the number of births to mothers normally resident in the County Borough was 326.

The number of deaths registered was 87—51 males and 36 females. The number of deaths of persons resident in the County Borough was 82.

Three deaths from tuberculosis were recorded, 2 of which were from tuberculosis of the respiratory system and one from tuberculous meningitis.

Sixteen deaths were due to malignant neoplasms.

There were 4 deaths from pneumonia and one from bronchitis.

Three accidental deaths were registered, two of which were caused by transport vehicles, and one by suffocation.

Among the deaths of infants under one year, 2 were due to congenital malformations, 2 to injury at birth, 2 to pneumonia and one to gastro-enteritis.

Eight of the deaths recorded during the week for the County Borough were those of children under one year of age, 3 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 40.

TABLE I.—**BIRTHS** and DEATHS registered during the week ended Saturday, 13th September, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 38 Vol. LXXXIX. WEEK ENDED SATURDAY, 20TH SEPTEMBER, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 262—142 boys and 120 girls, while the number of births to mothers normally resident in the County Borough was 209.

The number of deaths registered was 108—49 males and 59 females. The number of deaths of persons resident in the County Borough was 94.

Four deaths from tuberculosis were recorded, all of which were from tuberculosis of the respiratory system.

Fourteen deaths were due to malignant neoplasms.

There were 4 deaths from pneumonia and 4 from bronchitis.

One accidental death was registered, this was the result of a transport vehicle collision. There was one death by suicide.

Among the deaths of infants under one year, 2 were due to pneumonia, one to injury at birth, one to haemolytic disease of newborn, one to atelectasis and one to prematurity.

Six of the deaths recorded during the week for the County Borough were those of children under one year of age, 4 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 53.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 20th September, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 39 Vol. LXXXIX. WEEK ENDED SATURDAY, 27TH SEPTEMBER, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 324—150 boys and 174 girls, while the number of births to mothers normally resident in the County Borough was 248.

The number of deaths registered was 132—58 males and 74 females. The number of deaths of persons resident in the County Borough was 106.

Tuberculosis caused 7 deaths 6 of which were from tuberculosis of the respiratory system and one from tuberculous peritonitis.

Thirteen deaths were due to malignant neoplasms.

There were 7 deaths from bronchitis.

Gastro-enteritis caused 2 deaths.

Two accidental deaths were registered one from a motor vehicle transport accident and one from a fall.

Among the deaths of infants under one year 2 were due to gastro-enteritis, one to pneumonia, one to malformation and one to injury at birth.

Ten of the deaths recorded during the week for the County Borough were those of children under one year of age, 7 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 61.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 40 Vol. LXXXIX. WEEK ENDED SATURDAY, 4TH OCTOBER, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 330—158 boys and 172 girls, while the number of births to mothers normally resident in the County Borough was 256.

The number of deaths registered was 101—49 males and 52 females. The number of deaths of persons resident in the County Borough was 82.

Tuberculosis caused 2 deaths both of which were from tuberculosis of the respiratory system

Nine deaths were due to malignant neoplasms.

There were 2 deaths from bronchitis and 2 from pneumonia.

Gastro-enteritis caused 2 deaths.

Among the deaths of infants under one year, 3 were due to injury at birth, 2 to pneumonia, 2 to prematurity, one to gastro-enteritis, one to congenital malformation, one to convulsions, and one to kernicterus.

Eleven of the deaths recorded during the week for the County Borough were those of children under one year of age, 8 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 45.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 4th October, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 41 Vol. LXXXIX. WEEK ENDED SATURDAY, 11TH OCTOBER, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 367—194 boys and 173 girls, while the number of births to mothers normally resident in the County Borough was 298.

The number of deaths registered was 123—57 males and 66 females. The number of deaths of persons resident in the County Borough was 92.

Tuberculosis caused 6 deaths 4 of which were from tuberculosis of the respiratory system, one from miliary tuberculosis, and one from tuberculous peritonitis.

Eighteen deaths were due to malignant neoplasms.

There were 2 deaths from bronchitis and 2 from pneumonia.

There were 2 accidental deaths registered, one of which was due to a transport accident. There was one infanticide.

Among the deaths of infants under one year, 2 were due to prematurity, one to congenital malformation, one to pneumonia, one to atelectasis, and one to congenital debility.

Seven of the deaths recorded during the week for the County Borough were those of children under one year of age, 3 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 40.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 11th October, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 42 Vol. LXXXIX. WEEK ENDED SATURDAY, 18TH OCTOBER, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 300—174 boys and 126 girls, while the number of births to mothers normally resident in the County Borough was 233.

The number of deaths registered was 127—61 males and 66 females. The number of deaths of persons resident in the County Borough was 105.

Tuberculosis caused 8 deaths 5 of which were from tuberculosis of the respiratory system, and 3 from tuberculous meningitis.

Seventeen deaths were due to malignant neoplasms.

There were 10 deaths from bronchitis, 5 from pneumonia and one from influenza.

Gastro-enteritis caused one death.

There were 4 accidental deaths registered, one of which was due to a transport accident, and one to poisoning.

Among the deaths of infants under one year, one was due to prematurity, one to congenital malformation and one to injury at birth.

Three of the deaths recorded during the week for the County Borough were those of children under one year of age, 2 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 51.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 18th October, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 43 Vol. LXXXIX. WEEK ENDED SATURDAY, 25th OCTOBER, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 333—175 boys and 158 girls, while the number of births to mothers normally resident in the County Borough was 267.

The number of deaths registered was 145—79 males and 66 females. The number of deaths of persons resident in the County Borough was 115.

Tuberculosis caused 6 deaths, 4 of which were from tuberculosis of the respiratory system, one from miliary tuberculosis and one from tuberculous meningitis.

Twenty one deaths were due to malignant neoplasms.

There were 3 deaths from pneumonia, 2 from bronchitis and one from influenza.

There were 2 accidental deaths registered.

Among the deaths of infants under one year, 3 were due to broncho-pneumonia, 3 to congenital malformation, 2 to injury at birth, one to miliary tuberculosis and one to prematurity.

Ten of the deaths recorded during the week for the County Borough were those of children under one year of age, 5 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 66.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 25th October, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 44 Vol. LXXXIX. Week Ended Saturday, 1st November, 1952. Price 2d. Net.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 280—152 boys and 128 girls, while the number of births to mothers normally resident in the County Borough was 219.

The number of deaths registered was 88—46 males and 42 females. The number of deaths of persons resident in the County Borough was 80.

Tuberculosis caused 7 deaths, all of which were from tuberculosis of the respiratory system.

Seventeen deaths were due to malignant neoplasms.

There were 3 deaths from pneumonia, and 2 from bronchitis.

There was one accidental death registered.

Among the deaths of infants under one year, 2 were due to congenital malformation, one was due to broncho-pneumonia, one to atelactasis and one to prematurity.

Five of the deaths recorded during the week for the County Borough were those of children under one year of age, 2 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 40.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 1st November, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 45 Vol. LXXXIX. Week Ended Saturday, 8th November, 1952. Price 2d. Net.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 284—159 boys and 125 girls, while the number of births to mothers normally resident in the County Borough was 218.

The number of deaths registered was 102—47 males and 55 females. The number of deaths of persons resident in the County Borough was 87.

Tuberculosis caused only one death, which was from tuberculous meningitis.

Fifteen deaths were due to malignant neoplasms.

There were 4 deaths from pneumonia, and one from bonchitis.

Among the deaths of infants under one year, 3 were due to pneumonia, 2 to prematurity, one to gastro-enteritis, one to congenital malformation and one to convulsions.

Eight of the deaths recorded during the week for the County Borough were those of children under one year of age, 3 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 44.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 8th November, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 46 Vol. LXXXIX. Week Ended Saturday, 15th November, 1952. Price 2d. Net.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 290—145 boys and 145 girls, while the number of births to mothers normally resident in the County Borough was 232.

The number of deaths registered was 100—59 males and 41 females. The number of deaths of persons resident in the County Borough was 82.

Tuberculosis caused 2 deaths, one of which was from tuberculosis of the respiratory system and one from tuberculous peritonitis.

Twenty deaths were due to malignant neoplasms.

There were 2 deaths from pneumonia, and one from influenza.

There were 5 accidental deaths registered, 3 of which were from transport accidents and one from burns.

Among the deaths of infants under one year, one was due to pneumonia, one to prematurity, and one to congenital malformation.

Three of the deaths recorded during the week for the County Borough were those of children under one year of age, all of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 48.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 15th November, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 47 Vol. LXXXIX. WEEK ENDED SATURDAY, 22nd NOVEMBER, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II. information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 240—126 boys and 114 girls, while the number of births to mothers normally resident in the County Borough was 189.

The number of deaths registered was 120—64 males and 56 females. The number of deaths of persons resident in the County Borough was 93.

Sixteen deaths were due to malignant neoplasms.

There were 5 deaths from pneumonia, 3 from bronchitis and one from influenza.

There were 5 accidental deaths registered, 3 of which were from transport accidents.

Among the deaths of infants under one year, one was due to pneumonia, 2 to congenital malformations and one to convulsions.

Four of the deaths recorded during the week for the County Borough were those of children under one year of age, 3 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 55.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 22nd November, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 48 Vol. LXXXIX. WEEK ENDED SATURDAY, 29th NOVEMBER, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 270—149 boys and 121 girls, while the number of births to mothers normally resident in the County Borough was 202.

The number of deaths registered was 131—52 males and 79 females. The number of deaths of persons resident in the County Borough was 108.

Tuberculosis caused 4 deaths, 2 of which were from tuberculosis of the respiratory system, one from tuberculous peritonitis and one from tuberculosis of the spine.

Nineteen deaths were due to malignant neoplasms.

There were 7 deaths from bronchitis, 4 from pneumonia and one from influenza.

There was one accidental death registered, which was from a transport accident.

Among the deaths of infants under one year, 2 were due to broncho-pneumonia, 2 to injury at birth, 2 to prematurity, one to gastro-enteritis, one to congenital malformation and one to pneumococcal meningitis.

Nine of the deaths recorded during the week for the County Borough were those of children under one year of age, 5 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 64.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 29th November, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 49 Vol. LXXXIX. WEEK ENDED SATURDAY, 6th DECEMBER, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 307—155 boys and 152 girls, while the number of births to mothers normally resident in the County Borough was 239.

The number of deaths registered was 147—81 males and 66 females. The number of deaths of persons resident in the County Borough was 129.

Tuberculosis caused 7 deaths, all of which were from tuberculosis of the respiratory system,

Twenty six deaths were due to malignant neoplasms.

There were 11 deaths from bronchitis, 3 from pneumonia and one from influenza.

There were 4 accidental deaths registered, one which was from a transport accident.

Among the deaths of infants under one year, 2 were due to broncho-pneumonia, one to pyelitis and one to congenital debility.

Five of the deaths recorded during the week for the County Borough were those of children under one year of age, one of whom was under one month old. Deaths of persons aged 65 years and upwards numbered 73.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 6th December, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 50 Vol. LXXXIX. WEEK ENDED SATURDAY, 13th DECEMBER, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 294—155 boys and 139 girls, while the number of births to mothers normally resident in the County Borough was 233.

The number of deaths registered was 159—77 males and 82 females. The number of deaths of persons resident in the County Borough was 140.

Tuberculosis caused 6 deaths, 5 of which were from tuberculosis of the respiratory system and one from tuberculous meningitis .

Ten deaths were due to malignant neoplasms.

There were 14 deaths from bronchitis and 9 form pneumonia.

There were 5 accidental deaths registered, one of which was from a transport accident, one from suicide, and one from burns.

Among the deaths of infants under one year, 7 were due to pneumonia, 2 to asphyxia, one to septicaemia and one to prematurity.

Twelve of the deaths recorded during the week for the County Borough were those of children under one year of age, 5 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 69.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 51 Vol. LXXXIX. Week Ended Saturday, 20th December, 1952. Price 2d. Net.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 212—102 boys and 110 girls, while the number of births to mothers normally resident in the County Borough was 138.

The number of deaths registered was 74—33 males and 41 females. The number of deaths of persons resident in the County Borough was 65.

Tuberculosis caused 3 deaths, all of which were from tuberculosis of the respiratory system.

Nine deaths were due to malignant neoplasms.

There were 6 deaths from pneumonia and 5 from bronchitis.

There were 2 accidental deaths registered, both of which were from transport accidents.

Among the deaths of infants under one year, 3 were due to pneumonia, 2 to congenital malformation, 2 to congenital debility and 2 to bronchitis.

Nine of the deaths recorded during the week for the County Borough were those of children under one year of age. Deaths of persons aged 65 years and upwards numbered 36.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 20th December, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 52 Vol. LXXXIX. WEEK ENDED SATURDAY, 27th DECEMBER, 1952. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 204—112 boys and 92 girls, while the number of births to mothers normally resident in the County Borough was 171.

The number of deaths registered was 124—60 males and 64 females. The number of deaths of persons resident in the County Borough was 113.

Tuberculosis caused 2 deaths, both of which were from tuberculosis of the respiratory system.

Sixteen deaths were due to malignant neoplasms.

There were 8 deaths from bronchitis and 7 from pneumonia.

There were 2 accidental deaths registered, one of which was from burns.

Among the deaths of infants under one year, 3 were due to pneumonia, 2 to atelectasis, one to asphyxia, one to bronchitis, one to accidental burns and one to prematurity.

Ten of the deaths recorded during the week for the County Borough were those of children under one year of age, 5 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 58.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 27th December, 1952, for the Principal Towns with similar particulars for BELFAST and DERRY.
